Copy of letter No.2782 dated 30th September 1904 from the President, Station Municipality, to the President , City Municipality;-~~through the~~ received through the Residency No.5015 dated 7-10-04.

Sir,

On the 14th of this month I received a report of a case of cholera from the Health Officer of the City with the remark "the man is reported to have taken infection in the Civil and Military Station".

2. I at once addressed Dr.Palpu and asked for particulars as to the man's name, age, nationality and place of residence in the Station.

3. In reply the Health Officer said "the name of cholera patient who is reported to have taken infection in the Civil and Military Station is Munia, a Madiga aged 25.He died in 12,Mysore road Bangalore City. The Registara of births and deaths of VII Division reports that the particular locality in the station where the man took infection is not traceable".

4. I have the honor to request that in future more care may be taken, for, I am sure you will agree with me that unless there is distinct reason for believing that infection was got in the Civil and Military Station, the fact should not find a place in an official return.

I have &c.
